## ABOUT ME

Seeking a position in an organization that can provide me with an opportunity to improve my skills and strengths in conjunction with the organizational goals and to attain excellence through experience.

## PROJECTS

### June 2023 - Sept 2023

#### COLLEGE COMPLAINT MANAGEMENT SYSTEM

Developed a comprehensive College Complaint Management System as a personal project, utilizing HTML, CSS, JavaScript, PHP, and MySQL. The system provides an online way of solving the problems faced by students in a college by saving time and eradicate corruption. The objective is to make complaints easier to coordinate, monitor, track and to resolve and to provide institution with an effective tool to identify and target problem areas, monitor complaints handling performance and make improvements. This project not only demonstrated proficiency in front-end and back-end technologies but also highlighted effective database design and user experience considerations.
